

## **Trip Report**

### **Oronogo-Duenweg Mining Belt**

**September 3, 2019 – September 5, 2019**

From: Daniel O’Crowley, Field Technician, SUPR/LMSE *DO 9/6/19*

Through: Preston Law, Branch Chief, SUPR/LMSE *PL 9/6/19*

To: Record Center – Site File (Oronogo-Duenweg Mining Belt)

#### **Trip Purpose:**

- Contractor oversight at Oronogo-Duenweg Mining Belt OU-1

#### **Results:**

##### **Oronogo-Duenweg Mining Belt OU-1**

##### **September 3, 2019**

- Daniel O’Crowley (EPA), Steve Kemp (EPA), and Todd Campbell (EPA) met with Nick Godfrey (Environmental Works) and Lucas Still (Environmental Works) to discuss disposal of waste from the Joplin Milling, LLC project at Gypstack Repository.
- Daniel O’Crowley monitored waste coming from the Joplin Mills, LLC project to Gypstack. No foreign debris (metal, wood, etc.) was noted in the waste.

##### **September 4, 2019**

- Daniel O’Crowley monitored waste coming from the Joplin Mills, LLC project to Gypstack. One load contained minimal amounts of metal. DO spoke with Lucas Still to remind Environmental Works that only contaminated soil was allowed at the repository.
- EQM hauled waste from MW-26-4 to Gypstack repository. EQM was also stockpiling waste from MW-14 to haul to Snowball repository in the future. Stockpiling was done due to wet conditions preventing on-road dump trucks from accessing the mine waste. EQM also worked on clearing and grubbing at MW-18 and clay capping portions of the Snowball repository.

##### **September 5, 2019**

- Daniel O’Crowley monitored waste coming from the Joplin Mills, LLC project to Gypstack. No foreign debris was noted in the waste.
- EQM hauled waste from MW-26-4 to Gypstack repository, MW-14 to Snowball repository, and Snowball to Snowball repository. EQM also worked on clearing and grubbing at MW-18 and clay capping portions of the Snowball repository.
